Yes, if that's what the group would like – John and Angela have only limited availability, but the rest of the technical team should be available to continue discussions, if necessary.

Thanks Stephanie. We are checking with the PRP group to verify availability. I understand from Robb Truedinger that this would be 2 meetings – the first including John Prince and Angela Carpenter from 11 to 12, and then continuation with the technical team after that.

Hi John,

Would the group be available to meet next Tuesday, 3/13, either from 11 to 12 or from 1:30 to 2:30?

I think those times work for us.

Thanks,  
Stephanie

Supinderjit and Stephanie – we would like to meet to discuss these comments, including both technical and policy issues. To make the meeting productive, we will need participation by USEPA management staff.

Please let me know when your team is available to meet.

**Subject:** Rolling Knolls - Draft Feasibility Study

Hi John,

Attached are comments on the draft FS report for the Rolling Knolls site which was submitted by the group on December 29, 2017. These comments incorporate input from EPA, NJDEP and FWS.

Once you have had a chance to review these comments, please let us know if you would like to set up a meeting to discuss any of them. EPA requests that a revised document be submitted by April 2, 2018.

Overall, EPA is surprised at the content and quality of this draft FS report. There are inconsistencies within the report and numerous areas that require further clarification. As you know, barring any unforeseen developments, the region currently plans to sign a Record of Decision for the site by September of this year. EPA does not want to take over revision of this document, but if the next draft is not substantially improved, we may elect to do so, in accordance with Section XII (EPA Approval of Plans and Other Submissions) of Administrative Settlement Agreement and Order on Consent for Remedial Investigation and Feasibility Study, II-CERCLA-02-2005-2034.

Please let me know if you have any questions.

Thank you,

Supinder
